

# baremedical®

## Suction Tubing

Baremedical suction connecting tubing is a clear, non-conductive tubing that connects the suction catheter to the suction canister and is designed to evacuate fluid and debris. Each tubing end has two soft universal female connectors for convenience and provides a secure attachment to any standard male connection.

### Features & Benefits

- Strong material provides high collapse resistance
- Clear PVC-formulation with striated walls provides clear visualization, superior strength and secure suction
- Not made with natural rubber latex
- Single use

### PRODUCT INFORMATION
