Calcium Alginate

Baremedical calcium alginate dressings are a primary dressing that can be cut to fit wounds with a moderate to heavy exudate. They absorb wound fluid while maintaining a moist wound environment. The alginate, derived from seaweed, turns to a moist gel mass material when saturated.

Features & Benefits

- Helps absorb moderate to heavy amounts of wound exudate and may help control minor bleeding.
- Can be used to fill or pack the dead space in a wound.
- A secondary dressing is needed to hold alginates in place and to protect the wound from outside contaminants.
- Optimal gelling profile allows dressing to avoid sticking to the wound bed and helps maintain physical integrity to allow removal from the wound in one piece.
- Highly absorptive, non-occlusive.
- May be trimmed to fit wound dimensions.

PRODUCT INFORMATION

Material	Calcium Alginate
Sterility	Sterile
Shelf Life	3 years
Colour	White
Latex Status	Latex Free

ORDERING DETAILS

STYLE	Sheet	Sheet	Rope
SIZE	5 x 5cm	10 x 10cm	1.9 x 30.5cm
CH2 CODE	2528079	2528087	2556601
UNIT OF MEASURE	Pack of 10	Pack of 10	Pack of 5
