

baremedical®

Skin Closure Strips

baremedical skin closure strips are designed to provide superior wound closure and security. They are made of a macro porous non-woven polyamide material with pressure-sensitive adhesive. baremedical skin closure strips are ideal for primary closure, and help secure, close and support small cuts and wounds. Additionally, they provide wound support following early suture or staple removal.

Features & Benefits

- Ideal for closing small cuts and wounds
- Unique micro-porous construction is designed to permit skin ventilation and help prevent maceration
- Easy to apply and comfortable to wear
- White in colour
- Reinforced
- Not made with natural rubber latex
- Single Use
