

baremedical®

Hydrocellular Silicone Foam

Baremedical hydrocellular silicone foam dressings are highly conformable dressings for wounds with light to moderate exudate. The perforated, soft, silicone gel adhesive provides a gentle, but firm adhesion which minimizes pain and trauma to the wound and skin upon removal. The silicone foam dressing can be lifted and repositioned without losing its adherent properties. The absorbent inner foam pad maintains a moist wound environment to help promote healing. Hydrocellular silicone foam dressings are an excellent choice when fragile skin is a concern.

Features & Benefits

- Highly conformable dressing
- Perforated soft silicone gel adhesive provides gentle but firm adhesion and minimizes pain and trauma to the wound and skin upon removal
- Can be lifted and repositioned without losing its adherent properties
- Absorbent inner foam pad maintains moist wound environment to promote healing
- Light to moderate exudate
- Seals the wound margins to help prevent exudate from leaking onto surrounding tissue, minimizing the risk of maceration
- Available with or without border

PRODUCT INFORMATION

Sterility	Sterile
Shelf Life	3 years
Latex Status	Latex Free
