

baremedical®

Tubular Bandage

Baremedical tubular bandages provide comfortable, controlled and consistent compression for strains and sprains, soft tissue injuries, support following cast removal, general edema, post-graft pressure for burns patients and rib injuries.

Features & Benefits

- Consistent support provided with a single layer
- Adjusts to the contours of the body and helps distribute pressure evenly over the surface
- Stays in place without need for clips, pins or tape
- Washable and reusable
- 10m in length
