

baremedical®

Patient Gown Sleeveless

Baremedical sleeveless patient gowns are perfect for patients undergoing any diagnostic testing or procedures. The gowns are dark blue in colour as well as having the sleeve holes cut to shape preventing patients chest from being exposed. Opening at the back, the gowns have both an adhesive tab at the neckline and a waist tie to ensure full closure.

Features & Benefits

- Larger sizing options allow for differing patient sizes
- Ultrasonic heat bonded seams and belt
- Adhesive tab for neckline closure as well as a waist tie
- Material is soft and provides a higher comfort to the patients
