| **EN** Gastroenteric Canine Formula | • Gastritis and enteritis  
• Vomiting and diarrhoea  
• Pancreatitis  
• Exocrine pancreatic insufficiency  
• Inflammatory bowel disease  
• Lymphangiectasia  
• Malabsorption, maladaptation  
• Hyperlipidaemia  
• Hepatic disease not associated with encephalopathy | • Source of medium-chain triglycerides provide a readily digested and utilised energy source  
• Diet is highly digestible, low in fibre, moderate in fat |
| Available in Dry and Canned Formulations | | |

| **HA** Hydrolyzed Canine Formula | • Elimination diet for food trials  
• Food allergy dermatitis  
• Food allergy gastroenteritis  
• Exocrine pancreatic insufficiency  
• Inflammatory bowel disease  
• Lymphangiectasia  
• Malabsorption  
• Hyperlipidaemia  
• Protein-losing enteropathy  
• Food intolerance  
• Chronic non-specific diarrhoea or vomiting  
• Pancreatitis  
• Hepatic encephalopathy | • Contains only hydrolysed protein sources that are modified to a lower molecular weight that is less likely to induce an allergic response  
• Diet is highly digestible |
| Available in Dry Formulation | | |

| **NF** Kidney Function Canine Formula | • Renal failure  
• Conditions that may benefit from moderate sodium restriction  
• Hypertension  
• Hepatic disease associated with encephalopathy  
• Calcium Oxalate Urolithiasis | • Reduced protein and sodium, low phosphorus  
• Source of omega-3 and omega-6 fatty acids  
• Maintains an alkaline urine pH |
| Available in Canned Formulation | | |

| **OM** Overweight Management Canine Formula | • Obesity  
• Hyperlipidaemia in overweight dogs  
• Diabetes mellitus in overweight dogs  
• Fibre-responsive colitis  
• Constipation | • Low fat, increased fibre and a high protein to calorie ratio  
• Contains a source of isoflavones (dry) |
| Available in Dry and Canned Formulations | | |

| **CN** Critical Nutrition Canine Formula | • Malnutrition  
• Conditions that require assisted feeding  
• Anorexia  
• Convalescence  
• Critical illness | • Concentrated energy source  
• Antioxidants to support a healthy immune system and aid in recovery  
• Diet is highly digestible, high protein, high fat with a smooth texture |
| Available in Canned Formulation | | |

<tr>
<th>Formula</th>
<th>For Nutritional Management of</th>
<th>Benefits of Formula</th>
</tr>
</thead>
</table>
| **DH**  | **DENTAL HEALTH FELINE FORMULA** | - Plaque and tartar accumulation  
- Healthy adult cats, including seniors, for everyday maintenance |
| Available in Dry Formulation | - Patented kibble texture  
- Optimal kibble size for everyday feeding  
- Perfect nutrition for adult cats  
- Added antioxidants and natural source of glucosamine |
| **DM**  | **DIETETIC MANAGEMENT FELINE FORMULA** | - Diabetes mellitus  
- Persistent hyperglycemia  
- Enteritis  
- Diarrhoea  
- Hepatic lipidosis |
| Available in Dry and Canned Formulations | - High-protein, low-carbohydrate diet  
- Helps normalise blood glucose levels  
- May reduce insulin requirements |
| **EN**  | **GASTROENTERIC FELINE FORMULA** | - Enteritis  
- Gastritis  
- Diarrhoea  
- Vomiting  
- Pancreatitis |
| Available in Dry and Canned Formulations | - High-protein, low-carbohydrate diet to meet the unique nutritional needs of cats  
- Provides optimal nutrition for cats with compromised gastrointestinal tracts |
| **HA**  | **HYDROLYZED FELINE FORMULA** | - Elimination diet for food trials  
- Gastroenteritis associated with food allergy  
- Food intolerance  
- Dermatitis associated with food allergy  
- Chronic non-specific diarrhoea and vomiting  
- Inflammatory bowel disease  
- Pancreatitis |
| Available in Dry Formulation | - Hydrolysed protein and a low allergen carbohydrate source to help reduce the risk of a food allergic reaction |
| **NF**  | **KIDNEY FUNCTION FELINE FORMULA** | - Renal failure  
- Conditions that may benefit from moderate sodium restriction  
- Hypertension  
- Hepatic disease associated with encephalopathy |
| Available in Dry and Canned Formulations | - Reduced protein and sodium, low phosphorous  
- Maintains an alkaline urine pH |
| **OM**  | **OVERWEIGHT MANAGEMENT FELINE FORMULA** | - Obesity  
- Diabetes mellitus in overweight cats  
- Hyperlipidemia in overweight cats  
- Constipation  
- Fibre-responsive colitis  
- Hairballs |
| Available in Dry and Canned Formulations | - Low fat, increased fibre and high protein to calorie ratio to help support safe and effective weight loss or help maintain a healthy weight |
| **UR**  | **URINARY St/Ox FELINE FORMULA** | - Feline lower urinary tract disease  
- Struvite stones and crystals  
- History of calcium oxalate  
- Idiopathic cystitis |
| Available in Canned Formulation | - Reduces the risk of both struvite and calcium oxalate stone formation |
| **CN**  | **CRITICAL NUTRITION FELINE FORMULA** | - Malnutrition  
- Conditions that require assisted feeding  
- Anorexia  
-Convalescence  
- Critical illness |
| Available in Canned Formulation | - Concentrated energy source  
- Antioxidants to support a healthy immune system and aid in recovery  
- Diet is highly digestible, high protein, high fat with a smooth texture |

These diets help minimise the risk of both struvite and calcium oxalate crystal formation, while nutritionally managing the primary condition.
