

# baremedical®

## Bandage Conforming

Baremedical conforming stretch gauze bandages are designed as a secondary dressing to help secure placement of primary dressings. They are made of a stretchable, soft, cushioning material which enables them to provide light compression while conforming to most of the body's natural contours. Ideal as a secondary dressing, they allow for movement while accommodating any increase or decrease in swelling. Featuring non-frayed finished edges to avoid fraying and linting. They are available in different lengths for caregiver convenience.

### Features & Benefits

- Polyester design provides elasticity while retaining its shape and reducing slippage
- Breathable and absorbent for added comfort
- Secures and stretches to conform to the body's contours
- Finished edges prevent unraveling
- Low-linting formulation helps to minimize the risk of fibers being left behind in the wound bed

PRODUCT INFORMATION	
Material	Non-Woven
Sterility	Non-Sterile
Shelf Life	5 years
Colour	White
Latex Status	Latex Free
